HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET COMPARISON BETWEEN THE CANNABIS STOCK MARKET CRASH AND OTHER STOCK MARKET CRASHES

We cannot structurally or statistically compare a cannabis penny stock market to the Internet Bubble of 2000 or the Wall Street Crash of 1929. We can compare the collapse of investor confidence in these three markets. In the last short months, Brockstein's Index has collapsed from -20% to -53%.

By the time the 1929 crash was completed in 3 years during 1932, stocks had lost nearly 90% of their value. Between 2000 – 2002, the stock market lost about \$5 trillion of market value. The Internet Bubble was not spared, but by 2004, 48% of the dot-coms survived.

Note: In 2000, the Nasdaq lost 39.28% of its value (4,069.31 to 2,470.52). In 2001, the Nasdaq lost 21.05% of its value (2,470.52 to 1,950.40). In 2002, the Nasdaq lost 31.53% of its value (1,950.40 to 1,335.51). The cannabis market crash is now in its second year. I believe it has at least another year to go.

Larger internet companies survived; smaller stocks disappeared. The current marijuana stock market crash appears to be similar to the rank and file of the cannabis stock market's smaller companies. In the 283 company Cohen Grassroots Marijuana Index, we note that the larger companies are doing better similar to larger internet stocks, but the rank and file of 248 smaller cannabis stocks are in serious trouble.

The cannabis/marijuana industry has not faced the reality of its stock market crash. Media hype avoids reporting on the reality of this crash. This summer ushers in the calm before the storm. It will get worse.
