## HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET

### CLINTON'S POSITION ON MARIJUANA IS A DECIDED PLUS FOR THE INDUSTRY

Hillary Clinton was quoted on the Jimmy Kimmel show as follows:

"The host joked.

Asked about clashing with Bernie Sanders' platform of de-criminalizing marijuana at the federal level, Clinton maintained that she wants to see weed removed as a Schedule I substance and "put on a lower schedule so we can actually do research."

"I think what the states are doing right now needs to be supported," she said. "And I absolutely support all the states that are moving toward medical marijuana, moving toward absolutely legalizing it for recreational use. But I want to see what the states learn from that experience because there are still a lot of questions we have to answer at the federal level."

I regard Clinton's position on marijuana as the most positive and bullish position I have seen in two years in this industry. Polls now show her well ahead of Trump. Whether they stay this way or not depends on the campaigns.

It would take the President of the United States to create momentum to move from Schedule 1 to Schedule 2.

If Trump gets in, and if Chris Christie is a major part of his Cabinet, I would think Trump might be pro-medical, but anti-recreational. Christie is on record as being completely against marijuana in all forms.
