HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET

CANNABIS STOCK MARKET RALLIES

The 420 Marijuana Index reported that the Cannabis stock market is now down -9.6% year to date.

There has been a considerable uptick in March of this year.

The Index was down as much as -20% in February.

The question is why has this market rallied?

The financial condition of most cannabis stocks is very poor.

The future of recreational nationwide is murky at best.

There appears not to be any intermediate chance for a rescheduling from 1 to 2.

The industry has no place to put its cash.

This is a penny stock market with volatility.

Does this roller coaster mean that the industry is turning around with an uptick in share prices?

The answer fundamentally is no.

Trading penny stocks in this market is more than dangerous. Follow the fundamentals, not market swings.

Investment should only be long term. Charting analysis has lost a fortune for traders following supposed chart gurus.
