## **HOW TO MAKE MONEY IN THE STOCK MARKET**

### **REVIEW OF SANTA FE GOLD (SFEG - \$0.095)**

1. On June 21, 2017, Santa Fe Gold stated that..." is Pleased To Announce Imminent Release of Financials, All Issues Have Been Resolved and SFEG Expects to be Fully Compliant and completely up to date as a Full Reporting Publicly Listed Company.
2. On August 18, 2017 the company announced its receipt of \$2.57 million of financing.
3. Today, September 4, 2017, gold is trading at a near recent high of \$1344.30.

These are three very bullish events for SFEG.

However, share prices have not reflected these significant corporate events. The stock continues to trade between 9 and 10 cents.

It appears that the SEC has not given SFEG final approval of its audit to allow SFEG to become a Full Reporting Publicly Listed Company.

However, substantial investors infused \$2.57 million of capital into the company. I would think that their investment anticipated SFEG shares becoming listed on Edgar.

This also means to me that the confidence of this investor group believes SFEG's audit problems are now over.

SFEG's assets and claims are substantial, especially its silver assets. The price of gold and silver is clearly important for the company.

I would think that in the near future the Company will get the go-ahead regarding its Full Reporting status.

At such time, the market would reflect that current share prices may improve upon Full Reporting Listing.
