HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET CANNABIS INDUSTRY STATISTICS

I read a report today estimating that all 52 states would vote in legalized recreational and/or medical marijuana by 2021

I think it is this kind of wishful thinking that propels this industry to kid itself and self sustain.

Most of the hype is directed by self serving media from self interests.

The issues are complex

This industry parrots that pot has not killed anyone.

It is just not true.

I know of no statistics that combine marijuana use with other drugs including alcohol, heroin in combination regarding automobile accidents, suicides etc. How much did marijuana contribute to these many fatalities?

I don't know how marijuana helps the heroin addict or if it is beneficial in combination with other drugs.

Clearly medical marijuana has benefits.

But its science has not won any Nobel Prize for Science.

It is Nobel Prize for Medicine awarded that validates many wonderful medical concepts.

This industry needs a Commissioner, someone who can direct the overall policy and direction of cannabis.

Without this person or body, the industry is left with self promoters promoting their own companies, their own agendas.

The result is that the industry is at the effect of the Federal government and an AG who hates pot.

It should and could be the opposite.
