### GALLOP POLL, YEAR END 2014

- ▶ We believe that national polls give us insight into the marijuana stock markets.
- ▶ Year end 2014 support has fallen to levels in 2011 through 2013. Yes, legal has fallen from 58% to 51%. No, not legal has increased from 39% to 47%.
- ▶ These numbers do not bode well for the marijuana stock markets. They reflect what drove the hype and Bull Market of 2014. These numbers indicate to me a national concern about THC.

Do you think the use of marijuana should be made legal, or not?
