HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET SESSIONS AND WHITE HOUSE TURMOIL

It is clear that the White House and this Administration are under severe political pressure.

The President may be pressured to shake up his staff.

Jeff Sessions has been mentioned as one of those on the bubble.

We do not know, of course, any color on this.

However, there may be a ray of hope for the cannabis industry.

If Sessions is ousted, it would be the best possible news for this industry.

As the regulation drama plays out, it is clear that Sessions is as against medical as he is recreational marijuana.

There are powerful arguments against medical marijuana even though it does relieve pain.

The first is that there is no Nobel Prize for Medicine validating anything having to do with medical cannabis.

The second in my mind, is that we really do not know the effects of THC on DNA. Research has pointed out that DNA is in fact compromised from THC.

The Nobel Prize for Medicine was awarded in 2009 for telomeres. Bad is short telomeres. Good is long Telomeres.

I know of no study that has linked THC to shortening telomeres. If any of our readers do know, please contact me.

The bottom line is that if THC shortens telomeres, the science of cannabis cannot be defended, medical or otherwise.
