HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET CHRIS CHRISTIE, OPIOIDS AND MARIJUANA

Chris Christie has joined the new Administration.

His stated job is to focus on opioids. Opioids, pot, cigarettes are regularly combined with alcohol. They are death to human health, individually and in combination.

Clearly Christie will have a continuing negative influence on cannabis.

We cautioned very early on that Christie's influence on this Administration regarding cannabis is considerable.

The Administration now has two, if not the two most negative attorneys opposing cannabis.

As negative as it is for the cannabis industry to have a determined DEA against marijuana, adding Christie to the Administration's team could not be worse news for cannabis.

I am amazed that this industry keeps rolling along without the apparent realization of a hostile Federal Government.

I do not see where the industry has backed off from its future projections of growth.

The hype continues.

It is self serving and I believe hurts the reality of sensible securities and stock analysis.

In more than 50 years in Wall Street I have not seen anything like this; where the Federal Government opposes an industry, but where the industry keeps growing.

Sooner or later the roosters will come home to roost. I would be very selective in investing in cannabis stocks, and target my investments at companies the least affected by a hostile DEA.
