HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET

POLLS

I watch the polls very carefully.

My view is that legalization and recreational acceptance of marijuana will be known by polls. The medical use of marijuana is slowly becoming acceptable in the United States. This position reflects the growing vote for the legalization of medical marijuana. Legalizing the recreational use of marijuana is also starting to gain with Washington and Colorado becoming the first states to legalize the use of marijuana for recreational purposes.

Oregon and Alaska have also passed laws to legalize marijuana. The shifting support is visible from the Gallup polls showing a 58% majority in October 2013 supporting legalization compared to only 50% in 2012 and just 12% supporting legalization in 1969.

Despite support falling in 2014, legalization of the use of marijuana for medical and recreational purposes has gained wide acceptance in the United States. The results of the latest Quinnipiac University poll conducted on July 28th, 2014 are unanimously supportive of the use of medical marijuana in Florida with 88% support.

Florida is a key state as is California. Florida almost crossed the finish line in its last election.

If both Florida and California vote recreational, the stoners will win nationally, and marijuana will be accepted in this Nation. There will be a very strong political battle in California come November 2016. I would think the same would be true in Florida. The industry's future rides on California and Florida.
