Newsletter: November 3, 2014, Issue 48

THE MARIJUANA STOCK MARKET HAS TURNED POSITIVE

- ▶ Our Newsletter 45 suggested that the marijuana stock market would turn positive anticipating November's elections. It did.
- ▶ The Cohen Grassroots Marijuana Index has improved 5 percentage points.
- ▶ Since March of 2014, the Index has reversed its downtrend from a loss of 84% to a loss of 79% from its highs in 2014.
- ▶ It is interesting that Jim Kramer predicted a turn-around in the small cap market on the day the marijuana market turned around.
- ▶ The marijuana stock market reacted at the same time as Kramer made his announcement.
- ▶ I speculate that the marijuana market turned positive more so because of November's elections.
- ▶ That said, a general bottom of the overall small cap market clearly has also powered the recent strength of the marijuana stock market.
- ▶ Investors have lost significant amounts of money in the marijuana Bear market.
- ▶ Many will sell into the anticipated rally, both for tax loss reasons and to recoup individual stock losses.
