HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET CANNABIS STOCK MARKET TURNS AROUND

Share prices of leading cannabis stocks have turned around considerably.

This positive performance has surprised many cannabis observers. Is there a reason for it?

It reflects that fact that this stock market is very sensitive to positive news.

However, the industry's problems continue but the reality of its 'being for real' is reflected in its stock market.

The 420 Investor Marijuana Index has now gone from about -25% since the beginning of 2016 to close to +15% YTD. The lows of 2014, were down approximately -97%.

This is clearly a roller coaster. This upswing speaks for caution; however recent performance is impressive.

Three bell weather names in this updraft are representative of the strength of this stock market:

Since March 11, 2016 CBIS, Cannabis Science is now up more than 110%.

Hemp Inc. has increased in price from \$0.037 hitting \$0.06 cents on March 29, 2016.

TRTC, Terra Tech since March 11 moved up close to +160%.

There are many concerning fundamental issues that have not been resolved in this industry. Investing should be long term while share prices today trade in uncharted waters. I see these problems as continuing throughout 2016.

Stock markets normally point to the future. Caution in this updraft is appropriate.
