## HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET

### THE FREEFALL OF THE CANNABIS/MARIJUANA STOCK MARKET

The cannabis/marijuana market continues its free fall.

I will be speaking in New York on June 18, 2015 on the Crash of the Marijuana Stock Market.

There are various reasons this market is now off about -42% since the beginning of the year.

For those of you attending the conference, please feel free to come up to me or call me on my cell phone.

We are witnessing something similar to Black Friday in 1929.

Is there a bottom?

We have said in our newsletters that this is an industry with little cash, an inability to raise cash, little sales, little if any earnings from the industry, poor management on balance and bloated capital structures.

The roosters always come home to crow.

If value is not there, share prices reflect operating results. On balance they are very poor in this industry.

With the summer doldrums arriving, investor interest in general is normally very weak.

I do not see any event that can turn this market around. Its problems continue and on balance are getting worse.

We noted that Arc View stated they had raised \$37 million in 2014. This figure is chump change for some Black Marketers in Humboldt county, California. The Black Market has cash. Public companies do not.
