HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET ENORMOUS POTENTIAL: AMFIL TECHNOLOGIES, INC. (AMFE) \$0.0175

Amfil Technologies, Inc. (AMFE) has the most potential growth and price upside of any of our 310 cannabis stocks that we follow.

Amfil Technologies Inc. is a public acquisition company, trading on the OTC Markets Exchange under the ticker symbol AMFE. The Company is located in the Greater Toronto area of Ontario, Canada. Amfil created a new holding acquisition company business model in 2013. Target acquisitions include income generating private companies, optimizing their operations under the Amfil Technologies umbrella. Amfil's Sept. 28, 2016 acquisition of Snakes and Lagers (trade name: Snakes and Lattes), exploded its share price by 300%, generating a 30-day trading volume of 1.6+ million shares which has recently increased.

Each of Amfil's subsidiaries has a growth scalable business model of geographic reach. The Snakes & Lattes acquisition is primed for explosive expansion through franchising and Company owned stores. The Interloc Kings business has employed additional crews based on demand. The multi-billion dollar legal marijuana industry is poised to accept Amfil's ozone based antimicrobial treatment products that may become a required industry standard. AMFE's gold subsidiary is an exciting basic asset value future foundation.

The Snakes and Lattes acquisition reported a staggering \$7.37 million in revenues, \$1.64 million in gross profits. This café oriented board game restaurant concept is one of the hottest service industry business models we have seen in years. AMFE has two facilities and a 10,000 square foot new facility to be opened. Huge share buying has come in, especially from Toronto.

Cash Flow from Snakes and Lattes should also be able to finance the enormous growth potential of Amfil's Ozone Growing Technology. Our target price is \$0.07 cents, projected 2017 growth doubles to \$15.6 million with \$28.3 million forecasted in 2018. We know of no cannabis related stock with this kind of potential price appreciation and corporate growth.
