Growlife (PHOT) Update

- The Growlife (PHOT) story is not yet known in the marijuana stock market
- Positive information will gradually seep into the market place.
- We believe share prices will reflect the turnaround in the company.
- PHOT has traded as low as \$0.06 cents a share.
- Over the next year, it appears to us that investors will look back at today's prices as a lost opportunity for long term capital gains.
- PHOT closed two unprofitable stores, one in Santa Rosa California, the other in Maine.
- Previous management made a huge mistake starting the Santa Rosa hydroponic store rather than simply buying on ongoing profitable operation.
- The Highway 101 market in California is one of the best in the USA. Ultimately PHOT will participate in this market, hopefully buying an ongoing profitable unit.
- We will keep close tabs on the PHOT hydroponic store business.
