HOW TO MAKE MONEY IN THE MARIJUANA STOCK MARKET

RECREATIONAL IN CALIFORNIA

I believe that the legalization issue regarding Recreational Marijuana will be decided by California's vote in late 2016 and/or a rescheduling from #1 to #2.

The question is whether these two events will turn around this stock market and settle legalization. I believe both issues will turn around the Crash of the Marijuana Stock Market.

California marijuana today is a red herring. Statistics indicate that about \$700 million was sold from dispensaries as we had previously mentioned.

Nobody really knows what percentage of this number is Medical. That depends on phony prescriptions.

Some suggest that about 90% is recreational. Others believe it to be about 95%+.

Whatever the number, it is clear that California is already a recreational state. There is very little medical.

There is powerful opposition to legalizing pot in California.

However, the California polls indicate that recreational will win in 2016. 55% of voters favor repealing prohibition. Older and younger groups have gained in percentages: 52% and 61% respectfully.

Patient investors have a chance to score big in the marijuana stock market. Today's depressed prices of solid companies can easily double or triple, some even more. This is the time to do in depth research and be patient.

Look for disruptive technologies with cash, real sales, ability to raise cash and fewer shares outstanding. We will highlight some of these stocks during the summer months.
